FOR IMMEDIATE RELEASE

## **Xytex Corp. Offers Exclusive Sperm Donors**

AUGUSTA, GA –Xytex Corporation is proud to announce the launch of its Exclusive Donor Program on Sept. 12, 2006. Xytex, an international sperm bank which is known for developing cutting edge programs, products and informational options, has developed this program to provide a specific donor's samples to only one recipient in order to create children through assisted reproduction.

The Exclusive program's "donor list" currently contains four donors. All units of donors who are offered in this select program must be purchased as a "package," meaning that all the donor's available units must be procured by the recipient. Currently, the number of available donors' units range between seven and 29, so the cost will depend on each donor's individual inventory. Cost for these units, because of exclusivity, will be approximately 30 percent higher than regular unit fees, which are \$100 more for Identity Disclosure Donors than for Anonymous Donors. At this time the Exclusive donor list boasts both Identity Disclosure Donors and Anonymous Donors.

"At Xytex we are always looking to develop programs that meet the demands of our clients. There are many prospective recipients who would ideally like exclusive rights to a sperm donor, so our new program should appeal to a large number of future patients," said Sheridan Rivers, director of Sales, Marketing and Corporate Communications.

If you are interested in more information about the Exclusive Donor Program please contact Xytex at [www.xytex.com](http://www.xytex.com) or at 800-277-3210.
